From this elevated sanctuary, a magnificent tableau unfolds, encompassing the shimmering waters of the Almenara golf course lake and the undulating contours of the verdant natural hills. Crucially, its commanding position within an already established and meticulously planned development ensures these spectacular views remain eternally unobstructed, safeguarding the serenity and intrinsic value of your future home against any unforeseen future constructions.

Beyond its unparalleled outlook, the plot itself presents a canvas of remarkable potential. It features an ingeniously contoured slope, thoughtfully pre-engineered to facilitate multi-level architectural designs. This natural topography allows for the seamless integration of a luxury residence featuring a grand ground floor and a captivating intermediate level, optimizing both living space and the celebrated views. With an impressive frontage of approximately 25 meters and a depth of 50 meters, there is ample scope to craft an expansive and distinctive dwelling. The optimal north-east orientation bathes the property in gentle, natural light throughout the day, creating an inviting and luminous ambiance, while simultaneously ensuring refreshing breezes and ever-changing scenic backdrops from dawn till dusk.

Offering exceptional architectural freedom, this plot boasts a generous 35% buildability and a 33% occupation rate. These impressive metrics provide a substantial margin to conceive and construct an expansive, bespoke detached villa, whether your vision leans towards sleek contemporary lines or timeless Mediterranean elegance. The land is fully fenced, guaranteeing immediate privacy and demarcation, and crucially, stands entirely clear of any prior constructions, offering a pristine foundation for your architectural aspirations. Furthermore, it is fully equipped with all essential modern infrastructure: reliable electricity, pristine water supply, and high-speed optical fiber connectivity, ensuring immediate readiness for development and seamless integration into modern living. The only exception, city gas, is a minor consideration given modern alternatives.
