The basement includes a stylish home cinema and another guest suite, ideal for entertaining or accommodating visitors. The outdoor areas have been thoughtfully designed with both aesthetics and practicality in mind, including an outdoor kitchen, BBQ and TV lounge area. The southwest-facing garden features automatic irrigation, mature lemon, orange, and mango trees, and evening lighting that enhances the property's ambiance. The integrated pool cover and natural stone wall tiling add elegance while protecting the pool system, which is powered by solar energy and includes a hidden UV cover—ensuring warm water even in winter with minimal energy usage.
