For discerning investors and those seeking the pinnacle of Mediterranean living, this offering represents a unique chance to realize bespoke residential dreams.

Imagine the possibilities afforded by a spectacular land parcel spanning 6,310.60 m². What sets this opportunity apart is the meticulous preparatory work already completed: a comprehensive feasibility study, a visionary basic project, and a detailed subdivision plan are designed for immediate implementation. This forward-thinking approach allows for the creation of two magnificent, independent plots, each far exceeding the minimum urban planning requirements for this prestigious area.

Specifically, the proposed subdivision delineates:

Plot A: A generous 3,162.40 m²

Plot B: A substantial 3,148.20 m²

This intelligent partitioning optimizes the land's potential, offering immense flexibility for future development, whether building two luxurious residences, developing one and selling the other, or safeguarding a significant asset in a prime location. Each plot promises an expansive canvas for architectural brilliance.

The proposed project design has been conceived with exquisite sensibility, meticulously adapting to the natural topography of the land. This ensures strict compliance with Benahavís' rigorous urban planning regulations and, crucially, guarantees breathtaking, unobstructed panoramic views from every vantage point. The commitment to integrating seamlessly with El Madroñal's natural beauty defines the essence of this development, offering a contemporary, fluid concept that champions spaciousness, natural light, and a seamless connection between sophisticated interiors and the captivating Mediterranean landscape.

The urbanistic parameters underscore the premium nature of this offering:

Proposed Project: Envision grand villas each spanning 592.00 m² above ground, complemented by an additional 360.00 m² of versatile basement/below-ground space.

Occupancy: A thoughtfully planned 13% in the project, well below the maximum permitted 15%, ensuring abundant green space and privacy.
